Courses under development
<p><u>Union/Labor History</u></p> <p>This course will allow individuals to go back in time to find out what happened when Apprenticeship started in the 12<sup>th</sup> century and all the things that have happened throughout history to bring us to this point. All I can say it is quite the story.</p> <p>At this time, a PowerPoint Presentation to use in the classroom portion of the course as well as a very thorough document handout that lays out in great detail the history of Apprenticeship, the date by date time shots of how things evolved through the years has been developed. Many thanks to Troy Knipple for his research and putting the Power Point and source document together. It is a great start, but there is more work to do.</p> <p>At this time, I have been going through the developed materials and designing suitable tests and quizzes for each section. I do not have a timeline for completion for this. Anyone interested in taking this should send me an email to: <a href="mailto:ken.skppin@sasktel.net">ken.skppin@sasktel.net</a>.</p>
